

Pipe, Fittings and Pipe Joints for Underground Fire Service Mains

Underground fire service mains are made from many different materials. Cast iron, ductile iron, stainless steel pipe, Polyvinyl Chloride (PVC), Polyethylene (PE), and Fiber Reinforced Composite (FRP of Fiberglass) pipe and fittings are acceptable when they are FM Approved.

Installation of these products should conform to FM Global Property Loss Prevention Data Sheets.

Polyvinyl Chloride (PVC) Pipes and Fittings

Pipe manufactured from this thermoplastic material is acceptable when FM Approved. Typical coupling is by push-on, bell and spigot joint with single elastomeric gasket. Fittings may be cast iron or other FM Approved materials.

PVC pipe should be installed and anchored according to the pipe manufacturer's instructions and FM Global Property Loss Prevention Data Sheets. For underground use only.

Company	Product	Listing Country	Certification Type
Ames Company Inc 1485 Tanforan Ave, Woodland, California 95776, USA	Polyvinyl Chloride (PVC) Pipe and Fittings	United States of America	FM Approved
Clow Canada 245 Industrial Dr, Grandview Industrial Park, Saint John, New Brunswick E2R 1A4, CAN	Polyvinyl Chloride (PVC) Pipe and Fittings	Canada	FM Approved
