

DELIVERING GOOD WATER TO YOU

November 28, 2017

To Whom It May Concern:

The American Water Works Association (AWWA) has issued the 2017 version of AWWA C901-17, *Polyethylene (PE) Pressure Pipe and Tubing made from material having standard PE code designation PE4710 and intended for use in potable water, reclaimed water, and wastewater service; Polyethylene pipe ranges in nominal size from 3/4 in. (19 mm) through 3 in. (76 mm) and conforms to the outside-diameter (OD) dimensions of iron pipe size (IPS) or to the inside-diameter (ID) dimensions of IPS pipe; Polyethylene tubing ranges in size from 3/4 in. (19 mm) through 2 in. (51 mm) and conforms to the OD dimensions of copper tube size (CTS).*

The new revisions for AWWA C901 are:

- The 1/2" pipe and tubing is no longer produced.
- The 3/4" to 3" IPS, and CTS sizes (3/4" to 2") are produced only in DR9.
- The 3/4" to 3" SDR sizes are produced only in DR7.

Please Note: This standard applies only to *pressure pipe and tubing made from PE4710 and shall be classified as CC2 or CC3 per ASTM D3350, for use in potable water service applications.*

Products made to the new AWWA C901-17 standard will carry that designation on their print line. Please contact Engineering any further information, (800) 621-4404.

Thank you,

Chuck Clark
Vice President of Production
