THE INVISIBLE BACKBONE
of Modern Infrastructure

1 AGRICULTURE
Sustaining Growth at Scale

Advanced water transport and irrigation systems enabling efficient farming, crop health, and long-term land productivity.

2 HOUSING DEVELOPMENTS
Connected Communities Start Underground

Reliable pipe networks deliver clean water, safe gas distribution, and protected electrical pathways to homes and neighborhoods.

3 PARKS, GARDENS, AND GOLF COURSES
Reliable Irrigation, Healthier Landscapes

Durable piping systems support efficient sprinkler networks, helping maintain consistent water delivery across fairways, greens, and landscaped areas.

4 STREET & ROAD PROJECTS
Federal and City Infrastructure

Durable water, gas, and electrical conduit systems powering transportation corridors, public utilities, and essential municipal services beneath every mile of roadway.

5 OFFICE BUILDINGS
Infrastructure That Keeps Business Moving

High-performance piping systems supporting building utilities, climate systems, power delivery, and daily operations.

6 ICONIC VENUES & MEGA STRUCTURES
SoFi Stadium & Sphere Arena

World-class destinations depend on world-class infrastructure-JM Eagle systems support the utilities behind landmark entertainment and sports venues.

7 DATA CENTERS
Critical Systems. Zero Compromise

Precision-engineered piping protects power, cooling, and utility infrastructure that keeps the digital world online 24/7.

8 MANUFACTURING
Built for Industrial Performance

Heavy-duty pipe solutions engineered for demanding environments, supporting process systems, utilities, and plant operations.

9 WIND & SOLAR ENERGY
Supporting Renewable Power Generation

Robust conduit and utility piping systems connecting turbines and solar arrays to the grid and protecting critical energy infrastructure.

MODERN
INFRASTRUCTURE

MADE IN AMERICA

LEADING PVC, PE & ABS PIPE MANUFACTURER IN THE WORLD

- Enough pipe produced annually to circle the globe 12 times.
- In business since 1982, under consistent family ownership.
- Workforce of over 1,200 employees and revenue exceeding $2 billion.
- 17 manufacturing plants in the U.S., plus 2 strategically located distribution centers.
- Our logistics partner, Ascending Eagle, features a 100-truck fleet to ensure fast, reliable shipments directly from our manufacturing plants and distribution centers.
- Combines advanced product technology with state-of-the-art automation to ensure industry-leading quality.

ONE STOP SHOP

We are the only plastic pipe manufacturer that makes everything

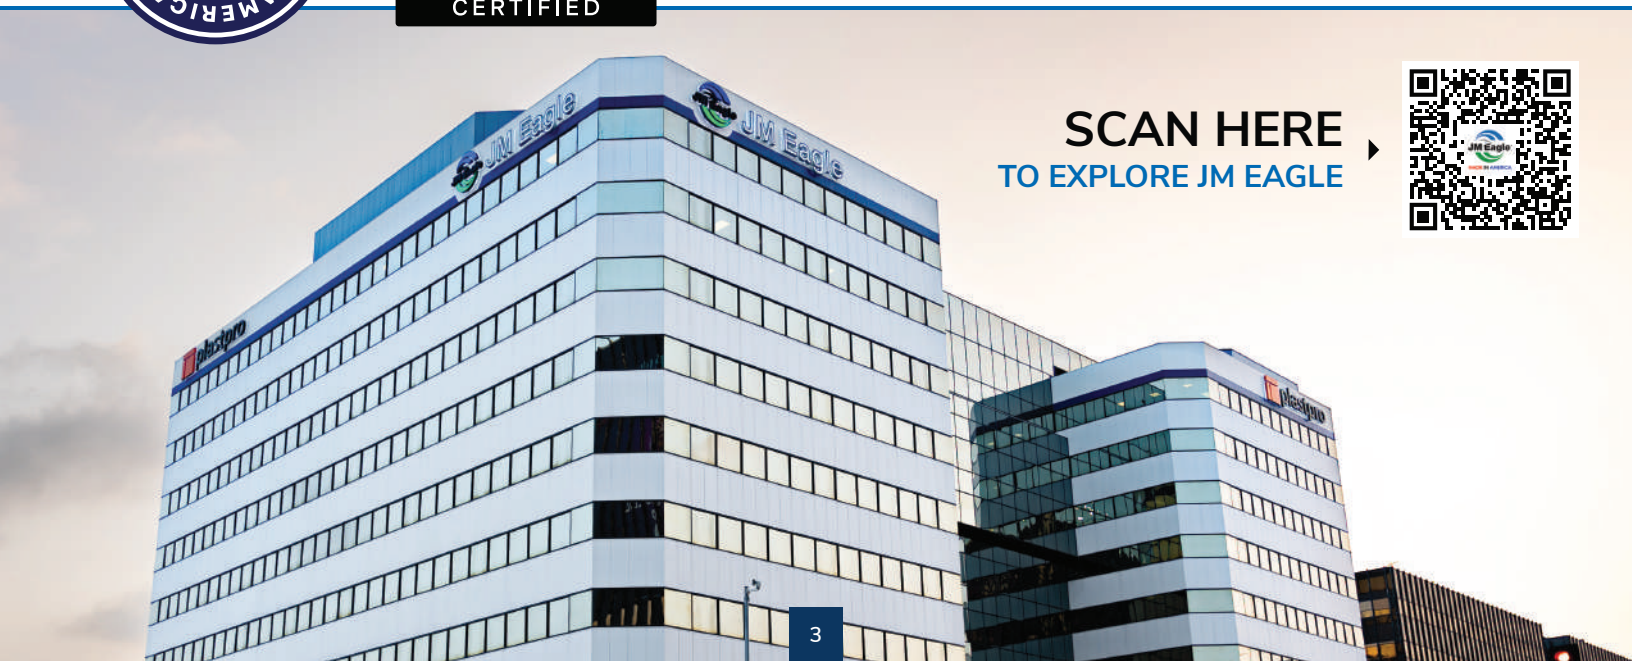

- Average Plant Manager tenure is 24 years.
- Widest range of high-grade, high-performance plastic pipes in the industry including: PVC, PE & ABS.
- Strength lies in both product diversity and a skilled, diverse workforce nationwide.

Our Partnership

- Meets evolving market needs to stay competitive in waterworks, irrigation, plumbing, electrical, gas and infrastructure sectors.
- Supports American jobs and local economies through domestic production and distribution.
- Committed to delivering life's essentials with eco-friendly, reliable pipe products that support health and quality of life worldwide.

LARGEST SELECTION

The only manufacturer offering every type of plastic pipe, from PVC, PE to ABS, serving diverse needs.

BEST VALUE

Innovative high-quality products, sustainably manufactured and offered at competitive prices.

SERVICE

Reliable, on-time delivery backed by Ascending Eagle Trucks and a focus on service, reliability, and consistency. Clear communication and reliable, consistent product stocks create a customer-first approach.

PROJECT SPOTLIGHTS

WATERWORKS DIVISION

Tampa Bay Port Authority

A major infrastructure project involving JM Eagle PVC pipe at a critical logistics hub for trucks and docks. While managed by the Port Authority, the suitability of the PVC for this high-pressure environment was verified through a specific study by the Army Corps of Engineers.

Amazon Data Center

Large diameter HDPE water pipe, sewer pipe and electrical conduit were used in the construction of this massive national data center.

Miami Water Transmission (Rickenbacker Causeway)

Although a municipal project, it serves critical federal and defense-adjacent infrastructure, including the Port of Miami, using 20-inch JM Eagle HDPE pipeline installed via horizontal directional drilling (HDD).

Fort Lauderdale Redundant Forced Water Main Project

This $62 million dollar project utilized 54-inch JM Eagle HDPE pipe to ensure resilient wastewater transmission.

Grand Canyon National Park & Havasupai Tribal Community

Massive multi-year repair to Transcanyon Waterline that supplies water for local native community and millions of park visitors.

Port of Morrow Airport Utilities

Multi-year major infrastructure project along the Columbia River in the Pacific Northwest. Bringing clean water, advanced communication and modern docks to the region.

Connecticut New Haven Corridor Improvement

A $2 billion dollar project using 1,900 linear feet of 48-inch HDPE for a trenchless application to replace failing iron pipe. These mains carry 20mgd average flow and up to 60mgd in wet weather, making replacement critical to protect New Haven Harbor's water quality and shellfish beds.

St. George and Washington Canal

JM Eagle supplied the first U.S. domestically produced 63-inch HDPE pipe for a $13 million dollar canal replacement in St. George, UT. The project replaced a leaky concrete canal and now conserves water, reduces flood risk and improves public safety.

Red River Army Depot

JM Eagle's Ultra Blue IPS PVCO was used extensively for new water mains and sewers at this major US Army depot. Playing a vital role in US Military modernization, the depot supports the Marine Corps, Air Force, and Navy, sustains thousands of jobs in Northeast Texas, and generates a $1.6 billion annual economic impact, making it a national asset vital to regional stability and growth.

PROJECT SPOTLIGHTS

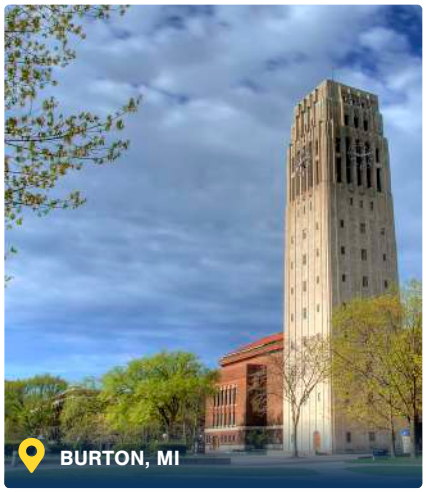

WATERWORKS DIVISION

Disneyland

JM Eagle is the exclusive pipe partner of Disneyland and provides water pipe, electrical conduit and sewer pipe to the happiest place on Earth.

City of Burton Michigan Water Infrastructure Project

Burton, MI decoupled from the Flint water system when the lead pipe crisis occurred. City officials systematically replaced 18 miles of corroded metal pipes with JM Eagle Pipe. JM Eagle was honored by the city with their Innovation Award for using our C909 pipe product.

Waikiki Beach

After a massive 500,000-gallon sewage spill threatened Waikiki Beach, JM Eagle provided the HDPE water pipe to save the beach and protect residents from enormous bacterial infection risk.

American Samoa Power Authority

JM Eagle's PVC water pipe is delivering water services to approximately 89% of Samoa's population.

Lilly Pharmaceutical Plant

A $2.1 billion dollar project utilizing 14 miles of JM Eagle HDPE water pipe.

PROJECT SPOTLIGHTS

ELECTRICAL DIVISION

LAX People Mover Train

A wide variety of JM Eagle electrical sweeps and conduit were used to bring mass transit to LAX airport.

TSMC

JM Eagle large diameter conduit and other electrical products were used to build one of the largest semiconductor manufacturing facilities in the United States.

New Albany Meta Data Center

The New Albany Meta data center, the first in Ohio, is part of global infrastructure that brings Meta technologies and programs to life, making the future of human connection possible. This data center will play a vital role in accelerating AI progress, delivering over 1 gigawatt of computer capacity to house the Meta AI cluster, Prometheus.

Kaiser Permanente

Electrical conduit was used to build an all electrical hospital, powered by solar panels.

LS Power Grid California

A $2 billion dollar electrical transmission project that will strengthen the grid reliability and expand access to efficient energy resources across Alameda and Santa Clara counties.

Micron

A $50 billion dollar project building Micron's Boise campus. Powering chip expansion and AI growth utilizing JM Eagle's large diameter conduit and electrical sweeps.

LA Olympics 2028 Telecom

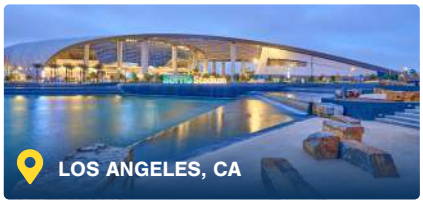

JM Eagle's versatile HDPE communication duct was used to link all Olympic venues throughout Southern California.

Sphere

JM Eagle's electrical conduit and PVC water and sewer pipe were used exclusively in building this iconic entertainment venue.

SoFi Stadium

Electrical conduit, water pipe and sewer pipe were used to construct the most technologically advanced sports and entertainment destination in the USA.

Tesla Gigafactory

JM Eagle's electrical conduit and sweeps were used to bring Tesla's global headquarters and manufacturing hub to life.

United States Border Wall

JM Eagle Electrical conduit and HDPE water pipe were used to modernize and secure the U.S. southern border.

PROJECT SPOTLIGHTS

IRRIGATION DIVISION

The Wonderful Company

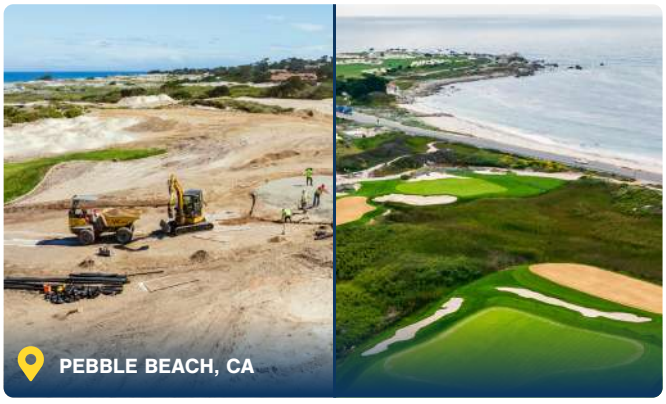

Eleven miles of JM Eagle's 36" C900 water pipe was used to pump water from the California aqueduct directly to pistachio farms at The Wonderful Company, the world's largest grower of pistachios.

Grimmway Farms

JM Eagle's innovative Agriloc product, a new backwards compatible irrigation system, was used to irrigate row crops in the Central Valley for the largest American grower of carrots.

Links at Spanish Bay Golf Course

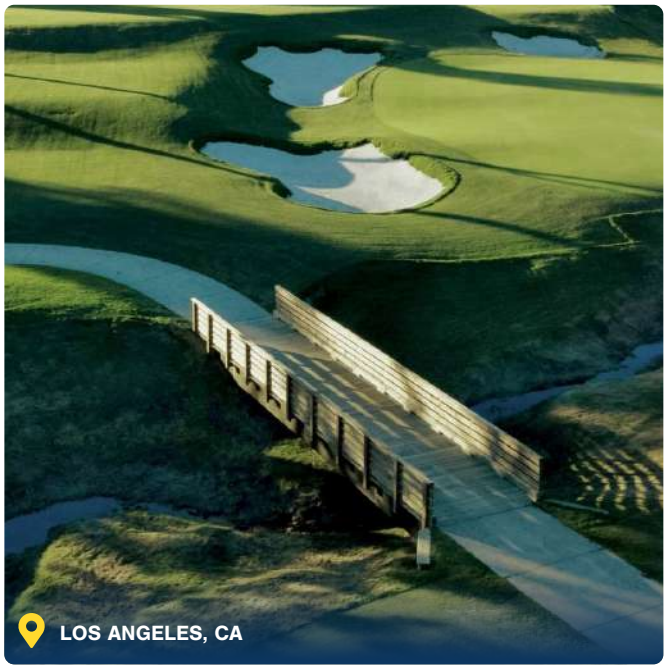

North America's number 1 golf resort, The Links at Spanish Bay, utilized JM Eagle PVC pipe to modernize the course in preparation for the 127th U.S. Open.

LambWeston

JM Eagle irrigation and agricultural pipe products were used to bring fresh water to LambWeston, a key provider of potatoes to McDonald's.

Wilshire Country Club

JM Eagle donated thousands of feet of HDPE irrigation pipe, which helped to restore this historic and iconic championship golf course to its grandeur. The country club is also home of the JM Eagle L.A. Championship, one of the top LPGA golf tournaments.

PROJECT SPOTLIGHTS

IRRIGATION DIVISION

Shadow Hills Country Club

JM Eagle's HDPE irrigation pipe was used to renovate the 18 holes of this historic country club, bringing new life to their emerald fairways.

Hutterite Community Farm

Five miles of PVC agricultural pipe bringing clean water to the Hutterite communities of the Pacific Northwest.
The communities are major potato growers for the American market.

PROJECT SPOTLIGHTS

PLUMBING DIVISION

Veterans Administration New Housing and Medical Campus

JM Eagle plumbing, sewer and waterworks pipe were used to create new housing for 1,200 of our American heroes.

Honey Creek Sanitary Sewer Replacement Project

JM Eagle PVC sewer and plumbing pipe was used to overhaul residential sewer mainlines in a growing suburb of Dallas, TX.

LA County Sanitation District (Joint Outfall C)

This large-scale infrastructure rehabilitation in Long Beach, CA utilized JM Eagle's HDPE pipe.

Macomb Interceptor Drainage District

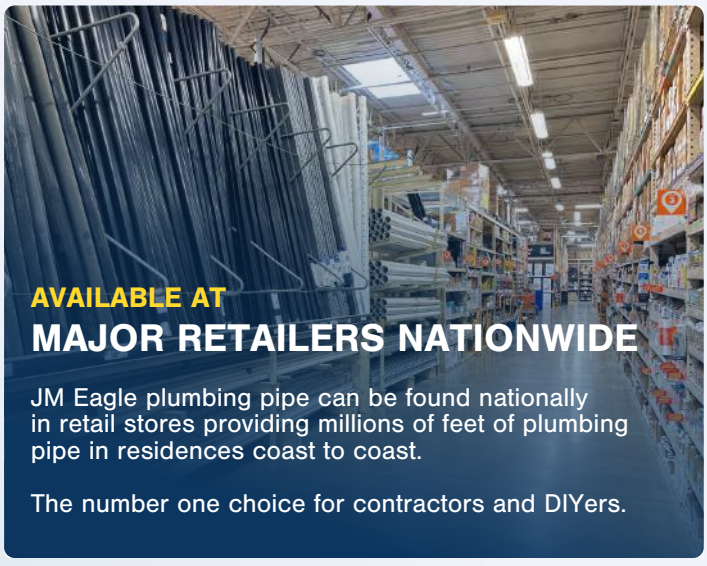

A 17.2 mile project involving major sewer, drainage and sinkhole rehabilitation using JM Eagle products to prevent catastrophic sewer failures.

Intel Semiconductor and Data Center Developments

JM Eagle provided HDPE and PVC sewer and plumbing pipes as well as electrical conduit for massive Intel semiconductor and data center developments near Johnstown, OH.

PROJECT SPOTLIGHTS

ENERGY DIVISION

Homer City Redevelopment

Thirty-two hundred acre, natural gas powered AI and data center campus. The largest of its kind in the U.S., JM Eagle HDPE gas distribution and waterworks pipe were used in this $10 billion dollar transformation of a decommissioned coal plant.

WaterBridge Gas

U.S. Bureau of Land Management approved this pipeline buildout designed to transport natural gas from the WaterBridge Button Booster site to the Summit gas pipeline using JM Eagle 30-inch HDPE Gas distribution pipe made of recycled products.

Municipal Gas Distribution

Reliable, code-compliant piping for urban and rural gas networks.

Oil & Gas Gathering

High-strength HDPE for gathering lines and transmission.

Energy Transmission

Large-diameter, high-pressure pipelines with long service life.

Specialty Gas

MDPE for low-pressure gas and pool gas applications.
